Abstract

The following three sentences were automatically selected from the source text using a trigram language model trained on the full corpus of four sources. Each sentence was scored by the average log-probability of its constituent trigrams. Sentences whose trigrams appear more frequently in the corpus receive a higher score, making them the most *representative* sentences of the source.

- The Rolling Stone History of Rock and Roll.
- The following tables show the probabilities of rhythm archetype occurrence in particular jazz and rock styles.
- The history of jazz and rock Despite that, the frequency of pattern occurrence and the pattern characteristics themselves make it possible to identify typical jazz and rock archetypes.
