Abstract

The following three sentences were automatically selected from the source text using a trigram language model trained on the full corpus of four sources. Each sentence was scored by the average log-probability of its constituent trigrams. Sentences whose trigrams appear more frequently in the corpus receive a higher score, making them the most *representative* sentences of the source.

- For a few years it became the most commercially successful form of rock and roll.
- Because the development of rock and roll was an evolutionary process, no single record can be identified as unambiguously "the first" rock and roll record.
- Ruth Padel claimed that rock and roll was one of the first music genres to define an age group.
